

ETL-634(X)-375(M)

Miniature 5VDC Output Pressure Transducer

- Smallest High Performance Amplified Transducer Worldwide
- High Temperature Electronics 365°F
- Patented Leadless Technology
- Rugged Design Provides Compatibility With Most Corrosive and Conductive Media
- High Over Pressure Capability
- Aerospace Quality Components
- Designed and Engineered For Severe Environmental Conditions

The ETL-634X-375M is one of the newest generation of Kulite standard, smallest miniature amplified transducer. Incorporation of Kulite proprietary high temperature 365°F (185°C) electronics within the main body allows for
