

ETQ-13-375(M)

Miniature 4-20mA Output Pressure Transducer

- 4-20mA Output
- 2 Wire Operation
- Hybrid Microelectronic Signal Conditioner
- Flush Diaphragm Coupled With Protective Screen
- All Welded Construction
- Qualified Configuration For Industrial Applications
- Economically Designed For OEM Applications
- 3/8-24 UNJF or M10 X 1 Thread
- Intrinsically Safe Applications Available

The ETQ-13-375 Series of miniature pressure transducers are flush diaphragm units utilizing a Kulite Piezoresistive Element. Mounted within the body of the transducer is a hybrid regulator-amplifier which provides a stable, low noise output.
