

CCQ-062

Cryogenic Ultraminiature Pressure Transducer

- Cryogenic Operation -320°F to +250°F (-195.5°C to +120°C)
- Available All Standard Pressure Ranges
- Ideal for Wind Tunnel Applications
- Excellent Static and Dynamic Performance
- Rugged

Similar in design to the XCQ-062 Series, these sensors are specifically intended for use in cryogenic wind tunnel applications.
