

BM-750

Flush Diaphragm Millivolt Output Pressure Transducer

- High Output
- Hygienic Construction
- Process Instrument Compatible
- Flush Stainless Steel Diaphragm
- Hermetic Sealed Container
- Intrinsically Safe Applications Available
- Silicon on Silicon Integrated Sensor VIS®

This midsize range of Kulite pressure sensors, incorporating flush stainless steel diaphragms, are designed for high accuracy and long life.

Typical applications include tank contents, head pressure and soil stress measurement. The units are made of stainless steel and are available in various output types.
