

HKL-375

Miniature High Pressure Transducer

- Excellent Stability
- All Welded Construction
- Robust Construction
- High Natural Frequencies
- 3/8-24 UNJF or M10 X 1 Thread
- Patented Leadless Technology VIS®

The HKL-375 is a miniature threaded pressure transducer. The hexagonal head and o-ring seal make it

The HKL-375 utilizes Kulite's Patented Leadless Technology. A solid state piezoresistive sensing element

This advanced construction results in a highly stable, reliable and rugged instrument with all the advantages
