

APTE-51HL-1000

Aircraft Differential Pressure Transducer

- Developed For Use With High Line Pressure Compared To Low Differential Pressure
- Ideal For Measuring Pressure Drop Across Filters To Monitor Filter Clogging
- High Natural Frequencies
- Unprecedented Stability and Reliability To High Temperatures (Ruggedized Internal Construction)
- Leakproof, All Welded Construction No Leak After Exposure To 2000°F (1093 °C)
- Utmost In Safety (Secondary Containment Of Pressure Media)
- Fully Qualified (Passed Extensive Environmental Tests, RTCA/DO-160F)
- FAA Manufacturers Maintenance Facility
