## ETL-422-375

5 VDC Output Pressure Transducer

- 5 VDC Output
- Hybrid Microelectronic Regulator-Amplifier
- All Welded Construction
- Hermetic Sealed Package
- Aerospace Quality Components
- Thermorad Jacket Compatible With All Aircraft Fluids
- 4 Wire (ETL-422-375) 3 Wire (ETL-422-300-375)
- Patented Leadless Technology

The ETL-422-375 is a miniature threaded pressure transducer. The hexagonal head and o-ring seal mal

The ETL-422-375 utilizes Kulite's Patented Leadless Technology. A solid state piezoresistive sensing el

This advanced construction results in a highly stable, reliable and rugged instrument with all the advanta
