

HKM-233-375

Miniature High Pressure Pressure Transducer

- Excellent Stability
- High Natural Frequencies
- All Welded Construction
- Hermetic Sealed Package
- Aerospace Quality Components
- Thermorad Jacket Compatible With All Aircraft Fluids
- Robust Construction
- Intrinsically Safe Applications Available

The HKM-233-375 is a miniature threaded pressure transducer. The hexagonal head and o-ring seal m

The HKM-233-375 utilizes a flush metal diaphragm as a force collector. A solid state piezoresistive sens

This advanced construction results in a highly stable, reliable and rugged instrument with all the advant
