

ETM-375

5 VDC Output Pressure Transducer

- 4-20mA Output
- 2 Wire Operation
- Hybrid Microelectronic Signal Conditioner
- Flush Diaphragm (ETM)
- All Welded Construction
- Secondary Containment on Absolute and Sealed Gage Units
- Aerospace Quality Components
- 3/8-24 UNJF or M10 X 1 Thread
- Intrinsically Safe Applications Available

ETM-200-375 transducers employ the same approach to transducer construction as the standard ETM-375.

The Kulite proprietary electronics module in this product line, however, provides a current output signal (4-20mA).
