

HKM-15-500

Miniature High Pressure Transducer

- Excellent Stability
- All Welded Construction
- Robust Construction
- Suitable For Shock Pressure Measurements
- High Natural Frequency
- 1/2-20 UNF Thread

The HKM-15-500 is a miniature threaded pressure transducer. The hexagonal head and o-ring seal make it easy to install. The HKM-15-500 utilizes a flush metal diaphragm as a force collector. A solid state piezoresistive sensing element is mounted on the back of the diaphragm. This advanced construction results in a highly stable, reliable and rugged instrument with all the advantages of a piezoresistive sensor.
