

XTE-190

Miniature Ruggedized High Temperature Pressure Transducer

- Easy Installation
- High Natural Frequency
- High Temperature Up To 525°F
- Silicon on Silicon Integrated Sensor VIS®

The ruggedness of this sensor has not compromised its performance. It was designed for ease of installation.

Its wide operating range (-65°F to +525°F) makes it ideal for numerous applications in Aerospace and other high-temperature environments.
