

XTEL-4-SD-625

High Temperature Static-Dynamic Pressure Transducer

- Inconel 625 Screw Housing
- Superior Signal to Noise Ratio of Dynamic Sensor
- Innovative Mechanical Filtering System
- Miniature, Robust Construction
- Ultra High Temperature 840°F (Front End)
- Patented Leadless Technology VIS®
- Separated Static-Dynamic Output
- Dual SOI Sensor on a Single Structure
- Excellent Long Term Stability
- High Accuracy
- -65°F to +840°F (-55°C to +430°C) Front End

The XTEL-4-SD-625 (Inconel) Series are high temperature extremely rugged pressure transducers which
