

IPT-750

Flush Diaphragm Pressure Transducer

- High Output
- Hygienic Construction
- Process Instrument Compatible
- Flush Stainless Steel Diaphragm
- Intrinsically Safe Applications Available
- Silicon on Silicon Integrated Sensor VIS®

This midsize range of Kulite pressure sensors, incorporating flush stainless steel diaphragms, are designed for a wide range of applications.

Typical applications include tank contents, head pressure and soil stress measurement. The units are made of stainless steel and are available in various output types.
